Ahmedabad

## Summary

A creative and detail-oriented front-end web developer with a passion for crafting engaging, user-friendly web experiences. Proficient in modern web technologies, including HTML5, CSS3, JavaScript, and frameworks like React, Angular, or Vue.js. Experienced in responsive design, ensuring seamless performance across various devices and platforms. Skilled in translating design concepts into interactive, high-performance websites, with a strong focus on accessibility and usability.

## Projects

### Personal Gallery

- Curated and managed a diverse collection of artworks, enhancing gallery visitor engagement by 30%.
- Organized and executed monthly art exhibitions, increasing attendance by 40% through targeted marketing strategies.

### QMate: Museum Ticket Booking System

Develop a web-based application that enables users to browse museums, check available exhibits, and book tickets online. This system aims to enhance user experience, streamline ticket sales, and provide museums with efficient visitor management tools.
